Comments: The UAA was conducted in July 2005 and no WBCR was observed. The stream met the maximum depth criteria at 0 of 2 sites and the average depth criteria 0 of 2 sites evaluated. The stream was very shallow overall. No interviews were conducted. Because of the shallow depth of the stream, the committee recommends removing the WBCR designation. In addition, reference UAA ID# 505, which also resulted in a Remove Use recommendation.

**Committee Recommendation:** ☐ Retain Use ☐ Modify Use ☒ Remove Use ☐ Inconclusive
